I am a software engineer with a specialization in front end development. I have been working in this field for over a year, and I'm passionate about creating modern and responsive websites that not only look great but also function smoothly.

I received my training at X-Team, where I honed my skills in front end development and gained hands-on experience working on various projects. I am comfortable using a wide range of programming languages and tools, including HTML, CSS, JavaScript, and Bootstrap.

I love working on projects that challenge me and push me to learn new things. In my previous roles, I have worked with cross-functional teams to deliver high-quality products that meet client requirements and exceed expectations. I'm always on the lookout for new and innovative ways to improve the user experience and make websites more engaging and interactive.

💼 PROFESSIONAL EXPERIENCE

Obour city, Egypt   ***frontend Web developer***

🎓 EDUCATION

2019 September –
2023 July
Beni Suef, Egypt

Faculty of Computers and Information, Department of Computer Science

🧠 SKILLS

HTML • CSS • BootStrap • JavaScript • React.js • Redux • Node.js • Express
